

SCIFEST @ OUTREACH SATELLITE EVENTS

The demand for Scifest Africa to take the best of the festival to educators, learners and communities who cannot afford to visit the festival, or who find themselves in areas where educator support and resources is poorest, continues to grow.

Scifest Africa has collaborated with several organisations to implement parallel events during the festival in the Eastern Cape. These events are intended to provide role models and career guidance for the youth, encourage them to pursue science careers and inspire a love for the sciences from the general public. These events are planned, implemented and facilitated by these organisations in partnership with Scifest Africa.

Please note: All bookings must be done through the host organisations using the contact details provided in each entry.

EAST LONDON

EAST LONDON MUSEUM

WORKSHOPS, LECTURES,
SCIENCE SHOWS, ART & DRAMA

PRICE:	Free, booking essential

The theme for this year's South Africa's National Science Festival (Scifest) is 'Discover your element.' Scifest celebrates the International Year of the Periodic Table of Chemical Elements as proclaimed by the United Nations. On 6, 7, 11, and 12 March, a number of scientists who are attending the Scifest will visit Nelson Mandela University to present interactive talks and engage with students and staff.
